FIREFIGHTING ROBOT

THERMITE™ RS3

> CAPABLE OF OUTPUTTING 2,500 GPM FLOW RATE

The Thermite RS3 is a super-high volume, low center of gravity, wide chassis, industrial firefighting robot. The RS3 is remotely operated with a bellypack controller that provides high-definition video feedback for ultimate maneuverability in difficult conditions. The RS3's modular design and wider stance allows additional equipment to be incorporated, including a plow assembly and positive pressure ventilation (PPV) ventilator. Fabricated using industrial-grade steel reinforced rubber tracks, RS3 can navigate rugged terrain and withstand exposure to the extreme elements.

FEATURES

- > 36.8 hp diesel engine
- > 2,500 gpm nozzle
- > Stand off range of over 300 m
- > Track and vehicle cooling sprayers
- > Up to 20 hr of runtime without refueling
- > High strength industrial-grade belted rubber tracks
- > Provides reconnaissance and situational awareness in high risk areas
